Subject West Lake OU2 FS

FYI - Following up on the impromptu meeting we had after the Weldon Spring event, I contacted the PRP contractor to see if they could provide an electronic version of the Draft OU 2 FS that could be readily distributed to DNR solid waste and others who need to review it. It seems Eric Gilstrap and Shawn Munks were on the ball and had already made the request and had already been sent an electronic version on April 7th. I called Eric to confirm. Eric indicated that they got what they needed and had already distributed to Solid Waste, Air, DGLS, and the AGO.
